

Bootstrap Your Business In 30 Days

4 Steps to Starting Your Business for Less than \$100

ATTENTION: Don't Wait Any Longer!

If you've ever wanted to run your own online business, but don't know where to start, here are the four basic steps you'll have to go through.

01 Find Something to Sell

Choose a product or service to sell - If you don't have one of your own, there are plenty of companies that will pay you a commission when you send someone to their site and they make a purchase

02 Domain & Hosting

Buy a domain name and set up a hosting provider - Select a domain name for your business. Purchase a .com if possible, and choose a reliable hosting provider. We recommend:

SimpleNicheDomains.com

Hosting at NAMS.ws/host

03 Create the Site

Build your website - Site building platforms like WordPress.org make it easy to create your own website. You can build a traditional blog to market your product or service, or incorporate e-commerce software if you would like to have an online store.

04 Collect the Money

Add your shopping cart / payment processor - PayPal is a simple solution to receiving payments in your online business, but there are other shopping carts and payment processors as well. Some will sell your products through their own site if you want.

05 Add a Support Team with Right Training and Tools

NAMS
Novice to Advanced
Marketing System
Team | Tools | Training

Building an online business can be lonely and frustrating. That's why it's so important to find a support group of peers and mentors who can help you create the life of your dreams. Building your online business can be the vehicle for those dreams, but you have to take action. We at NAMS invite you join our community to get the support you need.
